

2023-24 Paid Internship for students in grades 10-12

Mission

Youth Champions was created to equip students with the essential skills and knowledge they need for the future to thrive in education, work, and life. Our mission is to ignite potential in students by providing tools that accelerate personal growth through a paid internship.

Overview

Established in 2017, Youth Champions serves approximately 250 high school students in grades 10-12 each year through a comprehensive curriculum that enhances their personal skills, helps them gain real-world experience, explore potential career paths and enables them to be competitive in the 21st century marketplace.

Program

Our students participate in a series of **24 virtual workshops with crucial topics such as problem-solving, leadership skills, financial literacy, good habits, personal responsibility, and independent thinking.** In addition, students attend **6 field trips and adventure days** designed to expand their horizons and begin to identify their strengths and interests.

Support

We provide access to industry professionals and individual mentors, college or trade school preparation support, a book club for students and alumni, panel discussions, and inspirational and video contests.

Earn \$1,000

To reward the commitment shown by our students, Youth Champions operates as an internship where students **earn up to a \$1,000 stipend** for completing milestones within this unique personal development program.
